

With 15+ years of experience advising organizations at the intersection of strategy, data, and AI, I help senior leaders solve complex problems, accelerate performance, and deliver sustainable impact. My work focuses on translating strategic intent into measurable results through rigorous problem-solving, advanced analytics, and scalable AI-enabled transformation.

I specialize in AI-driven decision-making, digital and data strategy, and operating model transformation—partnering with executives to identify value pools, design pragmatic roadmaps, and embed capabilities that endure beyond implementation. I bring a structured, hypothesis-led approach to ambiguity, ensuring solutions are analytically sound, operationally viable, and economically compelling.

As a strategic and independent thinker, I am deeply committed to continuous improvement across growth strategy, productivity, and AI adoption. My objective is to help organizations harness AI responsibly and at scale—driving step-change performance, supporting enterprise transformation and M&A integration, and building durable capabilities that create lasting value.

## SELECTED HIGHLIGHTS

- ❖ Led enterprise data governance, interoperability, and compliance initiatives across life sciences and healthcare, spanning R&D, clinical trials, manufacturing, claims, and commercial operations—establishing end-to-end data integrity, traceability, and regulatory compliance (FDA, EMA, HIPAA, GDPR, CCPA), reducing compliance violations by 60%.
- ❖ Drove large-scale healthcare and pharma platform transformation, owning Product Owner responsibilities for provider lifecycle, claims, CRM, and clinical systems; delivering measurable impact including 85% reduction in processing time, 95% improvement in data accuracy, 95% faster provider onboarding, and sustained 100% audit readiness.
- ❖ Designed and scaled interoperable data and analytics ecosystems, integrating IRMS, CTMS, IQVIA, and market access data; optimizing ETL/ELT pipelines, MDM solutions (Veeva, Informatica, SAP, Reltio), and AI-enabled analytics to improve decision-making and save \$10M annually.
- ❖ Provided senior leadership in agile, product, and operating-model delivery, serving as Product Owner within SAFe Agile Release Trains, managing epics, backlogs, PI planning, and cross-team dependencies while aligning engineering, UX, QA, compliance, and business stakeholders to deliver scalable, self-service platforms.
- ❖ Delivered growth, innovation, and commercial impact across consulting and startup environments, leading market research and product strategy resulting in a \$20M valuation, originating multi-million-dollar opportunities, driving 25% cost reduction and 40% repeat growth, and successfully delivering global systems for clients such as Diversey Inc. and McGraw-Hill Education.

## PROFESSIONAL EXPERIENCE

---

**Employer:** Prophecy Consulting Inc

**Client:** Otsuka America Pharmaceutical Inc

**Address:** Princeton, New Jersey, USA

**Duration Of Employment:** 1 years (April-2025 to Till Date)

**Job Title:** Senior Business Analyst/Product Owner

**Domain:** Medical Affairs Systems, IT Management, Audit Management, GxP

**Skills Used:** AI, Postman, Agile (JIRA), Waterfall, Figma, Vendor Product Analysis, Visio, Tableau, SQL.

- Served as Senior Business Analyst/Product Owner supporting the Medical Affairs organization at Otsuka Pharmaceutical, leading requirements definition and delivery for enterprise system implementations and upgrades across medical, regulatory, and clinical operations.
- Partnered with Medical Affairs, Medical Information, Publications, MSIs, Compliance, and IT to gather, analyze, and document business requirements for platforms supporting scientific exchange, investigator-initiated studies, evidence generation, and medical content management.
- Led end-to-end requirements management, including current-state assessment, gap analysis, future-state design, and validation for new system rollouts and enhancements in a GxP-regulated environment.
- Authored detailed business and functional requirements, user stories, process flows, and acceptance criteria using Jira and Confluence, ensuring alignment with GxP, 21 CFR Part 11, FDA, EMA, and internal SOPs.
- Collaborated with solution architects, vendors, and development teams to translate Medical Affairs needs into scalable, compliant technical solutions and integration designs.
- Supported system validation activities including IQ/OQ/PQ, UAT planning and execution, traceability matrices, and validation documentation to ensure audit readiness and regulatory compliance.
- Coordinated system upgrades and data migrations, validating data integrity, interoperability, and security across Medical Affairs, clinical, safety, and commercial systems.
- Facilitated stakeholder workshops and design sessions to model complex Medical Affairs workflows, including medical inquiry management, content review, field medical engagement, and compliance reporting.
- Partnered with data and analytics teams to define Medical Affairs KPIs and reporting requirements, enabling insights into field medical effectiveness, scientific engagement, and operational performance.
- Worked closely with QA, Compliance, and Regulatory teams to ensure solutions met pharmacovigilance, transparency, and medical compliance standards, supporting inspections and audits.
- Acted as a trusted liaison between Medical Affairs leadership and IT, driving change management, training readiness, and successful adoption of new systems and enhancements.

**Employer:** Prophecy Consulting Inc

**Client:** HealthFirst Inc

**Address:** Manhattan, New York, USA

**Duration Of Employment:** 3 Years 1 months (March-2022 to March-2025)

**Job Title:** Data Engineer/Product Owner

**Domain:** Provider Lifecycle Management

**Skills Used:** RapidMiner, Dataiku, Tableau, SQL, Figma, Agile (JIRA), Waterfall, Visio, Postman, API.

- Served as Data Engineer/Product Owner on an AI-driven Provider Lifecycle Management project at HealthFirst Inc., leading the delivery of intelligent claims and provider platforms leveraging analytics, APIs, and Agile/Waterfall methodologies to optimize provider onboarding, inventory tracking, and regulatory compliance.
- Led product ownership for an AI-driven Provider Lifecycle Management (PLM) platform, supporting intelligent claims processing and provider data platforms to optimize onboarding, credentialing, inventory tracking, and regulatory compliance.
- Drove delivery of analytics- and API-enabled provider and claims capabilities, integrating structured healthcare data across enrollment, credentialing, and compliance workflows.
- Validated and optimized RESTful APIs using Postman and Java-based utilities to ensure reliable data exchange between provider systems, claims platforms, analytics services, and downstream AI components.

- Designed and executed API test collections simulating real-world provider onboarding, claims adjudication, and compliance scenarios to identify integration gaps and improve platform readiness.
- Defined, maintained, and governed EPICs and Features within a SAFe-aligned Kanban framework, ensuring alignment to HealthFirst's provider strategy, regulatory roadmap, and enterprise data initiatives.
- Served as Product Owner on a Scaled Agile Framework (SAFe) Agile Release Train (ART) delivering provider-facing platforms and internal operational tools using a hybrid Agile/Waterfall delivery model.
- Partnered with Product Management, Solution Architects, Data Engineering, and Release Train Engineers to define PI objectives, manage cross-team dependencies, and deliver system demos highlighting AI-driven provider insights.

**Employer:** HCL Technologies

**Client:** Otsuka Pharmaceutical

**Address:** 6 South Phase, Ambattur Industrial Estate, Ambattur, Chennai, Tamil Nadu - 600058, India

**Duration Of Employment:** 1 year, 9 months (Apr-2020 to March-2022)

**Job Title:** Senior Business Analyst/Product Owner

**Domain:** Clinical Trail System, Clinical Management, IT Management, Audit Management, Regulatory Systems, GxP

**Skills Used:** Microsoft Office, Agile (JIIRA), Waterfall, Figma, Vendor Product Analysis, Visio, API, Tableau, SQL.

- Led global business and technology transformation initiatives, applying competitive and market best practices to scale enterprise IT products and platforms from a \$0.5M to \$4M investment, with potential revenue impact of up to \$16M across the full delivery lifecycle.
- Owned CRM and commercial platform strategy and execution, leading requirements, gap analysis, and implementation across LIMS, Medical Coding System, Salesforce, Veeva, and Microsoft Dynamics to enhance sales, marketing, and service effectiveness, improving customer engagement, conversion, and retention.
- Served as Product Owner within a SAFe Agile Release Train, aligning epics, features, and delivery roadmaps with business value, PI objectives, and stringent regulatory requirements (GxP, 21 CFR Part 11) across Commercial, Regulatory, Medical Affairs, and IT for global pharma programs and drug launches.
- Designed and governed compliant data, analytics, and integration ecosystems, partnering with data engineering, clinical operations, CROs, and analytics teams to integrate CRM, ERP, CTMS, IQVIA, and market access data while strengthening data governance, MDM, and analytics accuracy.
- Ensured audit-ready delivery in highly regulated environments, leading system validation (IQ/OQ/PQ), UAT, QA coordination, and FDA-compliant documentation to meet GCP, EMA, ICH, GDPR, HIPAA, and FDA 21 CFR Part 11 requirements across multiple concurrent initiatives.
- Drove enterprise analytics, UX, and decision-support capabilities, delivering dashboards, KPI frameworks, data quality scorecards, and user-centered designs to support field force effectiveness, forecasting, and executive decision-making.
- Strengthened execution discipline and stakeholder alignment, facilitating cross-functional design sessions, future-state process and EDI modeling, and regulator/vendor engagement (e.g., Cloudera, Tableau, IBM), reducing project schedule variance to 4% while enabling scalable adoption across global teams.

**Employer:** Grapnel Tech Services LLC

**Client:** Otsuka Pharmaceutical

**Address:** Princeton, New Jersey, USA

**Duration Of Employment:** 2 years, 11 months (Feb-2017 to Jan-2020)

**Job Title:** Business Analyst/Product Owner

**Domain:** Clinical Trail System, Clinical Management, IT Management, Tech Ops, Audit Management, Regulatory Systems, GxP

**Skills Used:** Microsoft Office, Agile (JIIRA, Wrike), Waterfall, Vendor Management, Vendor Product Analysis, Visio, Tableau, SQL.

- Led large-scale global technology and product transformations, applying structured competitive and market analysis to scale enterprise IT products and platforms from a \$0.5M to \$4M investment, while delivering up to \$2M in operational cost savings across the lifecycle.

- Owned CRM and commercial platform strategy and delivery, leading requirements, gap analysis, and implementation across LIMS, Medical Coding System, Salesforce, Veeva, and Microsoft Dynamics to support sales, marketing, service, and market access functions, improving customer engagement, conversion, and retention.
- Served as Product Owner within a SAFe Agile Release Train, aligning product roadmaps, epics, and features with business value, regulatory requirements (GxP, 21 CFR Part 11), and audit readiness across Commercial, Regulatory, Medical Affairs, and IT for global pharmaceutical operations and drug launches.
- Designed and governed secure, compliant data and analytics ecosystems, partnering with data engineering, cybersecurity, clinical operations, and CROs to integrate CRM, ERP, EDC, CTMS, regulatory, IQVIA, and market access data into scalable enterprise pipelines.
- Delivered enterprise analytics and AI-enabled reporting solutions, leading end-to-end Tableau and big data initiatives—from research and design through rollout and adoption—driving an 80% productivity increase and \$5M in annual cost savings through AI-driven redesigns and optimized decision support.
- Established best-in-class UX, reporting, and design standards, creating UI/UX frameworks, wireframes, dashboards, and design systems, supported by user research, usability testing, and regulator engagement to ensure adoption, compliance, and consistent user experience at scale.
- Drove ecosystem partnerships and technology strategy, evaluating 200+ vendor products and leading executive-level engagements with firms such as Cloudera, Tableau, IBM, Inova, and others to align innovation investments with long-term growth strategy—impacting 5K+ global end users.

**Employer:** Cloudculina LLC

**Address:** 4 Walker ct, Monroe, New Jersey - 08831, USA

**Duration Of Employment:** 2 Year 3 months (Nov-2015 to Feb-2017)

**Job Title:** Senior Business Analyst

**Domain:** Business Strategy, Market Research, Business Management, Technology Analyst

**Skills Used:** Microsoft Office, Agile (JIIRA), Visio, SQL, Figma, API Testing (REST/JSON), SoapUI.

- Defined and executed a market-led mobile product strategy, leveraging deep market research to identify high-value opportunities and optimize deployment of a \$50K operating budget, laying the foundation for scalable product development.
- Co-built and scaled a high-growth food services venture, partnering with the COO to design innovative onboarding and selection models that reduced operating costs by 25%, increased repeat customers by 40%, and drove a 75% uplift in profitability through data-driven operational optimization.
- Led enterprise-grade market research and growth planning, spanning customer targeting, product innovation, and a 24-month pipeline, resulting in a \$20M business valuation and attracting strong interest from leading venture capital firms.

**Employer:** AppCow (JBS Enterprises LLC)

**Address:** 244 fifth avenue, New York NY 10001, USA

**Duration Of Employment:** 5 months (June-2015 to Nov-2015)

**Job Title:** Business Analyst

**Domain:** Business Strategy, Market Research, Business Management, Technology Analyst

**Skills Used:** Microsoft Office, Agile (JIIRA), Visio, SQL.

- Aligned client requirements with strategic objectives, synthesizing business needs, constraints, and pain points to design tailored solutions that addressed core operational and performance challenges.
- Partnered with business and IT stakeholders to co-create and implement customized, high-impact IT solutions, integrating functional design with enterprise technology strategy to drive efficiency and effectiveness.
- Enhanced process and financial performance, developing compliant business process models aligned with industry and regulatory standards and identifying delivery impacts that improved budget efficiency and reduced variance by 8%.

**Employer:** WIPRO Technologies

**Address:** No 72, KEONICS, Hosur Rd, Electronic City, Bengaluru, Karnataka - 560100, India

**Duration Of Employment:** 3 years, 9 months (June-2010 to Feb-2014)

**Job Title:** Project Engineer

**Domain:** Business Strategy, Market Research, Project Analyst, Project Delivery

**Skills Used:** Microsoft Office, Agile (JIIRA), Visio, SQL, Salesforce Admin.

- Led enterprise technology and process transformations for global clients (including Diversey Inc. and McGraw-Hill Education), acting as the senior liaison between executives and delivery teams to ensure strategic alignment, governance, and measurable business outcomes.
- Built and led high-performing global delivery teams, including offshore resources, establishing strong operating rhythms, performance management, and talent development to consistently deliver complex programs at scale.
- Provided leadership on complex functional and technical design, translating business strategy into robust specifications and scalable solutions aligned with enterprise objectives and technology standards.
- Strengthened client relationships and growth outcomes, institutionalizing continuous improvement to increase client satisfaction by 25% and originating over \$5M in new business through trusted executive and partner relationships.

#### **EDUCATION**

---

**Fairleigh Dickinson University: 2016** – MBA – International Business (GPA: 3.485)

**Anna University: 2009** – Bachelor of Engineering– Electronics and Communication Engineering (GPA: 4.0)
